- Independent study skills

What can students do after this course?

They will be able to progress onto a NC, HNC or degree level of study within the care sector at college.

Additional information on this course for Guidance Teachers

Higher Care is an excellent choice for any student who wants to learn the importance of working in a health, social or care setting. The course breadth will prepare students for the world of work and further study in this field. The depth of understanding and application required to pass the course will place students at a significant advantage when pursuing further study or work in the subject area.

The course involves a lot of theory work where students will learn sociological and psychological concepts as well as the importance of values and principles working in care. Case studies on real life care situations will be used to engage learners throughout the year.

Although classes are once a week, students will need to commit to regular private study in between classes to consolidate their learning. Private study tasks will be issued to students but individuals must take responsibility for completing these tasks. Since learners will be expected to take greater responsibility for their own learning and the development of their study skills, this course offers excellent preparation for any student considering progression to College or University study in any subject.

While the Higher course is available to students with no prior care knowledge, students who have studied Higher English will have a significant advantage when joining the course. Students considering the Higher course without any prior knowledge of care will find there is a lot to learn. Students with experience of studying at Higher level will be in a better position to rise to the challenge of studying an unfamiliar subject at a level they have already demonstrated ability at.

This course will be particularly suited to students who enjoy using computers and modern technology and are proactive in using technology to solve real life problems as we use a mixture of online and face to face teaching methodologies.

Students who have no prior care knowledge and no experience of studying at Higher level should be advised to think carefully about the implications of undertaking a new subject at Higher level. Guidance teachers can help students think through these implications and assess their commitment and study skills to determine the level of course that would be most suitable for them.
